

Heinrich Himmler Presentation SS Dagger

Price:€1,00

Product description

A scarce, original example of a Heinrich Himmler Presentation SS Dagger in good(+) condition. The obverse side of the blade is acid etched with the SS motto "Meine Ehre Heißt Treue". The reverse side of the blade features the acid etched dedication "In Herzlicher Kamaradschaft H. Himmler". The dedication retains deep and clear. Below the dedication is the maker logo for the firm of "Carl Eickhorn", which is positioned closer to the cross guard than seen on standard SS daggers to accommodate the room needed for the dedication etching. The dagger's blade was at some point cleaned but still looks very impressive. The solid nickel silver upper and lower cross guards show a beautiful natural patina throughout, and match each other perfectly. The under side of the lower cross guard is stamped with the numeral "4". The wooden black ebony grip features a nickel silver grip eagle and thin style SS runes. A chip at the SS rune and near the lower cross guard can be observed. The pommel nut is made of solid nickel silver, and matches the same patina as the daggers nickel cross guards. The early black anodized scabbard features a nickel silver scabbard throat and drag, which exhibit a nice even matching patina throughout. The scabbards fitting's screws appear to be in an untouched condition. The scabbard body is made of a black anodized steel which retains much of it's original protective "Zapon" lacquer. An early, non RZM, horizontal black leather hanger with nickel silver fittings is attached to the scabbard. This is a fine example of a Heinrich Himmler Presentation SS Dagger in very collectible condition.
